[2,4-D Choline salt ESA Work 12-17-13.docx](#)

Hi everyone,

This is the best time slot I could find to squeeze in a discussion of the 2,4-D choline salt ESA status this week, but I know it's pretty early in the day. If this doesn't work, I can reschedule for after the New Year. This Friday (12/20) or sometime next week looks like it would work for some folks, but others are starting leave for the holidays.

I'll be teleworking on Thursday, but will call in.

Attached please find a document outlining the ESA work that's already been to date.

Thanks,

Monica Wait
